VOLUME 10 NUMBER 41

CARBON, ALBERTA, THURSDAY, NOVEMBER 10, 1932

\$2.00 A YEAR IN ADVANCE

THE WORLD OVER

EXCISE TAX ON CIGARETTES CUT

FREE STATE TARIFF INCREASED

LOW GRAIN HANDLING CHARGES

THORNTON MAY ENTER POLITICS

Cheaper cigarettes and liquors will result from a bill passed by the House of Commons. Today the government introduced an excise tax on Canadian cigarettes from \$6 to \$4 a thousand and the excise tax on Canadian liquors from \$10 to \$7 a barrel gallon. The new National Tariff will be between \$7,000,000 and \$8,000,000 a year if consumption remains stationary.

LONDON, Nov. 5.—The United Kingdom again struck at the Irish Free State. The British Government has decided to Valero, boosting special duties imposed on imports of agricultural products to the Free State to a virtually prohibitive level.

Under powers granted in the Treaty of Ottawa, the government imposed the special duty on Free State entries from 30 to 40 per cent and that on the Free State butter, eggs, cream, bacon, pork and flour from 20 to 25 per cent. The duties are now in effect.

Hon. H. H. Stevens, Minister of Trade and Commerce, told the House of Commons on Monday that it was "extremely important" that world standard regulation in grain handling charges."

It was plotting a bill through the Senate to give the Board of Grain Commissioners power to vary grain-handling charges.

The bill was discussed briefly while in committee, but no committee of the whole House. It amends the Canadian Grain Act (domestic grain) by adding a new section which would be set by order or regulation of the board.

The effect is to give to the board the power to fix the rates and handling charges of grain "in any number of specified localities" or establish "any reasonable times" of the annual conferences when those rates have heretofore been fixed.

RUSTLERS GET JAIL SENTENCE ON OLD CHARGE

Theft's of cattle from the Two-Bar Ranch at East Coulee and from the Patterson and Sheepherder ranches, which were reported during the latter part of 1924 and early in 1925, had their culprits brought to justice yesterday on Wednesday, November 2nd, about 25 people assembled at the home of Mr. and Mrs. E. W. Maxwell, in honor of a newly married couple, Mr. and Mrs. Royal Hay, and spent a sociable evening playing games, and community refreshments, until refreshments were served.

David Kaseer and Marjory Martin entered the room, carrying a beautifully decorated basket containing refreshments and presented them to the bride and groom. Mrs. Wright tendered the best wishes of the community to Mr. and Mrs. Hay for a long and pros-

MR. AND MRS. ROYAL HAY HONORED ON THURSDAY

On Wednesday, November 2nd, about 25 people assembled at the home of Mr. and Mrs. E. W. Maxwell, in honor of a newly married couple, Mr. and Mrs. Royal Hay, and spent a sociable evening playing games, and community refreshments, until refreshments were served.

David Kaseer and Marjory Martin entered the room, carrying a beautifully decorated basket containing refreshments and presented them to the bride and groom. Mrs. Wright tendered the best wishes of the community to Mr. and Mrs. Hay for a long and pros-

DECREASE IN RADIO LICENSES

A slight decrease in radio licenses issued recently from Ottawa, which state that Alberta has this year 26,001 licenses compared with 27,401 last year. Edmonton city has shown an increase of about 1,000.

person wedded life. The bride and groom then opened the presents and enjoyed a short time of quiet relaxation and after the singing "For They Are Duly Wed" Gwendolyn" a very pleasant time ended with the dancing of a quadrille.

THANKSGIVING SERVICE

Last Sunday morning a thanksgiving service was held in the United Church, Carbon, and we have been asked to publish the results.

The preacher took as his text "Psalms 102". It is a good thing to give thanks.

Among other things he said: The thanks have been made by more than one person.

The thanks given this year are the result of prevailing conditions. The idea underlying such a view is that man is nothing without God.

There is an abundance of the material things that a man possesses. We need to realize that there is more to life than material things.

Others, and strengthen our courage. Many of our neighbors are in need.

The minister then closed with the blessing.

After the service the people gathered around the organ and sang a hymn.

Monetary Systems.

Individuals the world over have always discussed money. They have always been interested in money. But the vast majority of people in years gone by never bothered their heads very much about monetary systems, and how they worked. They knew that there was a "gold standard," but they did not care to know or understand just what that meant. They knew that Governments and banks issued paper bills and that these bills were money. But the main thing one and all were concerned about was how many of these bills could get in return for the products of the services they had to sell, and how far those same bills could go in buying the goods or services they wanted to buy. Of the time behind the issue of these paper bills the average person knew little and cared less.

Today this indifference has disappeared like so many other things in this rapidly changing world. People are still interested in money, how to get, how to spend it, and what will purchase for them. But they also want to know all about the system back of the issuance of money, and especially now. The people of the world are now acquainted with it, so a realization that the monetary system is not working as it should work in the interest and welfare of mankind, and we hear the opinion expressed on every hand that money has become the master and not the servant of mankind; that instead of rendering a more convenience in order to expedite the exchange of the world's products and services, it has itself become a commodity; and that being the case, the people want to know who controls the production of that commodity—money.

As a result of this aroused interest, everybody is talking about monetary systems. People are debating the subject whether they understand it or not. Some are for the gold standard, others for the silver standard, others for the gold-silver standard, and others for the paper standard. They have not out-numbered all the monetary and banking systems of the world, but of what is said, and is even being advanced as a panacea for the world's ills, is based in the most profound ignorance. The "cure" being offered would prove far worse than the disease they would seek to overcome.

Out of the confusion of ideas and suggestions and so-called solutions, one thing emerges. It is this: That no one nation can of itself remove the cause of its financial embarrassment and cure the malady from which it is suffering. There may be persons who honestly think that their pet theory will work where all others have failed; that a nation can, if it really tries, make its own laws, and that even a subordinate state or province within a nation can do the same.

In our dilemma, the safe thing to do is to take a middle-course—not to take the dictum of the banker on the one hand, nor the theories of the radical on the other hand, rather to weigh well the opinions and advice of impartial authorities of world economies, men who have no personal bias, weighing of all the effects, and who have no political affiliations. We believe that solutions should be reached based on solid fact and economic truth.

There are such men in most countries, and outstanding in this group in the world today is Professor Gustav Cassel, of Sweden. He is an originator, not merely an exponent of a great deal of modern economic thought. His career is one of the most remarkable in the history of modern governments' and by the League of Nations. His opinions cannot be lightly dismissed. He was invited to deliver the Rhodes Memorial Lectures this year at Oxford. There were three lectures dealing with the gold standard and the break-down of the world's monetary system. These lectures have now been published in book form.

The author of the latter of this book says that Professor Cassel mines no words in these lectures. There are none of the cautious phrasings and complicated qualifications to which one is accustomed in the writings of economists. He speaks as one having authority and evidently considers that his subject has been carried beyond the bounds of controversy. Professor Cassel first states that gold is the only standard to which all the governments' and by the League of Nations. His opinions cannot be lightly dismissed. He was invited to deliver the Rhodes Memorial Lectures this year at Oxford. There were three lectures dealing with the gold standard and the break-down of the world's monetary system. These lectures have now been published in book form.

Professor Cassel's book is a most valuable and practical guide to understanding the notion of "managed money" and talk largely about "sound money" by making it absolutely clear that we already have a managed money. In fact he attributes a great deal of our grief to the fact that not only is our money managed, but that it has been very badly managed. After pointing out the anomalies of the managed money, he makes the point that a good standard work must be conducted that could stand in any circumstances, be regarded as singularly unsuitable for use as a standard of value.

Professor Cassel complains of the loose and unintelligent use of the word inflation, which does not tell what the people think it means. Anyhow, he thinks that some inflation would be a good thing. "The best thing that the gold standard countries could do," he says, "would be immediately to start an inflation of their currencies." Remember, it is not crank man, who proclaims this, but one of the world's leading authorities, a mature man, whose influence has been established and proven.

It is the opinion of Professor Cassel that the best way to close class and consideration of all would-be monetary experts, currency reformers and re-organizers of our banking system. They may find comfort and support in some things, but they will also be staved away from many of the united theories they are now advancing and which this world authority expounds as utterly sound, and which, if put into practice, would bring disastrous results.

A correspondent says that when he takes his wife to a football match she shouts herself speechless. Now, that's an idea.

Japan and Britain
 London Mail Is Opposed To Any Anti-Japanese Proceedings

On behalf of this country it should be clearly known and generally recognized that we do not care to be involved in any anti-Japanese proceedings. The British nation will have nothing to do with such criminal lunacy. It regards Japan's presence in Malaya as a threat to the safety and security of that part of Britain in India or Egypt.—London Daily Mail.

In the years 1927-1931 inclusive the production of bicycles in Canada totalled 131,285, valued at \$3,676,265. There are three plants engaged in the industry.

Canadian Theatres Safe

Have Highest Rating in Respect To Fire Risk

Reports from Ottawa show that the theatres in Canada now have the highest rating in respect to fire risk of any property. This fact was brought out in the report just issued by J. Grove Smith, Dominion Fire Commissioner.

The report further shows that there were only 19 fires in theatres in the last year and not one of them of a serious nature. The total fire loss was only \$4,200.

The theatres have high credit to the type of most engaged in the business of managing theatres in the Dominion. Mr. Smith stated that nowhere in the world did the managers take the precautions to safeguard their theatres as do the managers in Ontario. When one goes to think that over \$3,000,000,000 of film was shown in the close on a thousand and theatres in Canada last year this small fire loss is remarkable.—St. Thomas Times-Journal.

HAD RHEUMATISM
 FOR 20 YEARS

But None Since 1930

This man must have something like a record for suffering. He says:—"I am 60 years old—have been a great sufferer with rheumatism. I am pleased to say that I am now free from this dreadful pain, simply by taking Krusken Salts—nothing else. I have been free for a long time to have that awful painful pain about . . . W.—P."

The rheumatism seems like his and everyone else's. It is caused by sharp-edged uric acid crystals getting into the joints and causing the fluid to dissolve those crystals away. Furthermore—if you keep up the little exercise you have to do, you will never be possible for them to form again. Rheumatism will gone for good.

Pays Fine Tribute

French President Pays Homage To German War Dead

Premier Edward Herriot, of France, paid tribute to the German war dead in an address dedicating a new municipal hospital.

"Here in Lens," Herriot said, "we have seen the German war dead who were undoubtedly men asking only to live in tranquility. Let us confer on them the honor that we have conferred on our own dead. France has not failed to honor her fallen."

What our countrymen plan is a plan for pacific organization which will obtain from everyone, a renunciation of arms."

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

Take Your Liver Tonic

You are "feeling poor" because your liver isn't pouring its daily two pounds of liquid bile into your blood stream. You are both hampered, and your entire system is affected.

What you need is a liver stimulant, Romaline, which gives you a healthy, inactive, ready-to-use energy or resiliency. It is a tonic that gives you a new lease of life.

Take Carter's Little Liver Pills. Puffy eyes, tiredness, lack of energy, etc., Ask for them by name. Refuse substitutes. See all druggists.

A total of 544,124 radio receiving licenses have been issued by the Canadian Radio Commission to stations April 1 to September 30, 1932, or approximately one to every eighteen persons of the population of the Dominion.

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine pack exclusively for children. These powders contain a special system which worms will regulate and stimulate the organs indirectly affected by the worms, and will encourage health and the digestion of the digestive processes. As a verminite it can be relied on for its effectiveness.

Thiefs of church poor boxes in London are more numerous than ever.

Scotland has many mysterious deaths.

Japan has many mysterious deaths.

Easy Teething

"Baby cut its teeth with no trouble, thanks to BABY'S OWN TABLETS," writes Mrs. Thomas Shaw, Hamilton, Ont., in a letter to Baby's Own Mothers have written in similar vein.

GIVE YOUR CHILD BABY'S OWN TABLETS for teething troubles, upset stomach, simple fever, colds, constipation, sleeplessness, or whenever he has a sore throat. Baby's Own is the only safe tablet to take as candy, and absolutely SAFE—see analysis certificate in each 25-cent package. Over 4,250,000 packages sold in 1931.

Dr. William's

BABY'S OWN TABLETS

Discover Strange Freak

Mummified Remains Of A Pygmy Found In Wyoming

Wyoming's scientists are poring deeply over the latest anthropological acquisition, made in the temporary possession of Mrs. Cyrus Beard, state historian. To all appearances the object, unearthed by a gold prospector, is a mummified pygmy or the remains of a child.

The archaeological freak is a human figure, in a cramped, kneeling posture with arms akimbo, somewhat similar to that of the Oriental Bud-

dhach. The strange feature is its dwarf size. The figure, sitting upright, measures but six and one-half inches in height. Its weight is about three-eighths of a pound. The exception of the head and hands are rather large, the object is uniformly proportioned anatomically. It has a fringe of silver grey hair in the back of the head and a form of hair over its body.

Cecil Mayne, Alliance, Neb., youth, who was prospecting for gold in the Mountainous, discovered the freak. Having estimated that it was 1,000 years old, he turned it over to Dr. Charles O. Hoxsey, of the Museum Institute, reported after an intensive survey.

He estimated that it had been dead about 1,000 years. The figure is a bank robber, according to the experts.

The whole system of pyramidizing a vast array of obligations which technically or practically, are payable on demand on a slender basis of cash or credit, is a major cause of the present financial crisis.

There is no dependence for solvency placed on assets which can only be liquidated by transfer or by wholesale destruction of monetary values.

The commissioners are surveying with the assertion that "while the United States is not the only important country in which banks become insolvent, it is the only one in which they are allowed to fall."

U.S. Bank Failures

Canot All Be Blamed On Business Depression Says Investigator

All American bank failures cannot be blamed on the business depression, Dr. Charles O. Hoxsey, of the Museum Institute, reported after an intensive survey.

He estimated that it had been dead about 1,000 years. The figure is a bank robber, according to the experts.

The whole system of pyramidizing a vast array of obligations which technically or practically, are payable on demand on a slender basis of cash or credit, is a major cause of the present financial crisis.

There is no dependence for solvency placed on assets which can only be liquidated by transfer or by wholesale destruction of monetary values.

The inspection of radio stations and programmes during the western tour of the commission will probably be concentrated along two lines, one with the incorporation of western stations in the Dominion-wide radio system in mind.

Radio Inspection

Commission To Investigate Radio Properties In The West

Inspection of radio properties in Manitoba and other provinces in the Canadian west by the recently formed radio commission will probably be concentrated along two lines, one with the incorporation of western stations in the Dominion-wide radio system in mind.

The members of the commission headed by Hector Charlesworth, chairman, are expected to reach Winnipeg early in December, and will continue their investigation of present broadcasting facilities.

The members

ANGLO-CANADIAN TRADE TREATY PASSES HOUSE

Ottawa, Ont.—The House of Commons ratified the Anglo-Canadian Trade Treaty, 128 to 56.

While Conservative shears responded through the corridors, the House of Commons placed its stamp of approval on the Anglo-Canadian Trade Treaty, negotiated at the Imperial Hotel in London.

Supported by one Liberal, J. L. Ilsey, Hants-King, N.S., and six Progressive, Conservative rolled up a majority of 48 as a climax to the three weeks of debate.

Maintaining their opposition to the last, Liberals enlisted two Independents and four Laborites in voting against the treaty.

Sixty persons were removed yesterday from the opposition. Premier R. B. Bennett rose to close the debate. He pleaded for a "fair and honest trial" for the agreement, "which will give Canadian producers free entry into the markets of 40,000,000 people."

He accused the Liberals, particularly Bt. Hon. Mackenzie King, of betraying and abandoning the time-honored party policy of fostering enterprising trade policies.

The six Progressives who supported the treaty were: D. K. Keay, Peace River; Alfred Speakman, Red Deer; W. T. Lucas, Camrose; M. N. Campbell, Mackenzie; Michael Luchkovich, Vegreville; and A. M. Carmichael, Kindersley.

Monetary Reform

U.F.M. Passes Resolution Urging Stabilization Of Rate Of Exchange

Dawson, Man.—United Farmers of Manitoba stand as proponents of monetary reform. After a lengthy debate delegates in annual convention here passed a resolution urging the Federal Government to stabilize the rate of exchange of the pound sterling.

Resolutions approving a reduction in lake freight rates and encouragement of shipments via the Hudson Bay route also were passed.

The resolution dealing with exchange was termed "biting the bullet to the point." A proposal of 4.85% was introduced and voted for. Many papers were read on monetary reform and the history of exchange in Canada for the past 25 years was given considerable airing.

Demand for the reduction in lake freight rates was also taken by the United Farmers of Alberta. It is put forward in protest against action of the Lake Shipping Association, which, since its organization in June, the resolution declares, has gradually increased rates from 3½ to seven cents a bushel.

Would Reduce Excise Tax

Cheaper Cigarettes and Liquor If Bill Passes

Ottawa, Ont.—Cheaper cigarettes and liquor would result if a bill introduced in the House of Commons by Hon. E. Rykman, Minister of National Revenue.

The Anglo-Canadian trade treaty reduced tariffs against cigarettes and liquors imported from Great Britain. The new bill would reduce to the same extent the excise tax paid by Canadian manufacturers, placing them on an equal footing with the distillers and cigarette manufacturers of Great Britain.

The excise tax on Canadian cigarettes would be cut from \$0.6 thousand to \$4, a saving of four cents on a package of 20. The tax on Canadian liquor would be reduced from \$9 to \$7 a proof gallon.

The Anglo-Canadian trade treaty reduced the duty on British cigarettes from \$1.10 to \$1.50 a pound, leaving the tariff against United States and other foreign countries at the higher figure. The duty on beer was reduced from \$10 to \$8 a proof gallon and against the United States and foreign impact was not touched.

Hairy Wheel Exports

Vancouver, B.C.—The city is not waiting for the effect of British government to send its wheat export to new high marks. During the past seven days, the weekly report of the Vancouver Merchants' Exchange reveals a total of 2,727,422 bushels were exported. This compares with a season's total of 20,821,560 bushels, as compared with 10,156,523 bushels at the corresponding date last year.

W. N. U. 1967

Against Public Ownership

C.N.R. Vice-President Does Not Believe In Government Operation

Montreal, Que.—"The Star prints the following despatch from its Ottawa correspondent:

"The plan proposed by E. W. Bent, K.C., president of the Canadian Pacific Railway, and Gerard Ruell, K.C., former legal vice-president of the Canadian National Railway, for the solution of Canada's vexed rail situation, were rejected by the recent royal commission on transportation in order that the scheme suggested by Sir Henry Thornton, former C.N.R. president, might be adopted in its essential outline."

"The estimate of savings was variously estimated as high as \$800,000,000. It was said another train had arrived with a larger quota. He denied the homes of some are in the west."

The jobless are said to have come from different parts of western Canada, many of them from the harvest fields in the prairie sections.

Jobless In Toronto

Mayor Asks Premier Bennett To Care For Transients

Toronto, Ont.—It is the duty of the Dominion Government to care for jobless men who arrived by train from the west, said Mayor Frank R. Stewart, and wired Premier R. B. Bennett that the government should provide for transportation of the men to their homes.

"The number of stragglers was variously estimated as high as \$800,000,000. It was said another train had arrived with a larger quota. He denied the homes of some are in the west."

The jobless are said to have come from different parts of western Canada, many of them from the harvest fields in the prairie sections.

New Air Regulations

Operating Plan For Canadian Penitentiaries Is ForbIDDEN

Toronto, Ont.—The Mail and Empire in a despatch from its Ottawa correspondent quoted J. A. Wilson, controller of civil aviation, as issuing an order forbidding operation of aircraft over Canadian penitentiaries.

The order, issued on an order as carried by the newspaper is:

"Pilots and operators of aircraft are hereby warned to avoid flying over or near penitentiaries or institutions. In future any aircraft operating intentionally flying over such institutions for any purpose whatever will be considered to have committed an infringement of the air regulations concerning prohibited areas."

New Wheat Tariff

New Duty Goes Into Effect In Germany

Berlin, Germany—A new wheat tariff was in effect in Germany Nov. 2, imposing a 7.5% marks duty (about \$1.77) per ton of wheat imported on all grain.

This tariff will not affect wheat brought into Germany, under ordinary tariff schedules, but only that grain previously brought in duty free on certificates issued by the government against wheat exported earlier in the year.

The total available for export is fixed at 1,300,000,000 bushels. Of this amount 600,000 bushels are held old stocks, and 730,000,000 bushels represent new crop.

Since the exportable stocks are adequate to meet almost nine-tenths of the needs of importers, practically the entire surplus of the 1932 crop will be carried over for consumption in 1933 and 1934.

It is estimated the existing stocks have increased by 110,000,000 bushels.

Wheat Surplus Increasing

Rome Institute Report Shows 110,000,000 Bushels Carry-Over

Rome, Italy—Exportable supplies of world wheat are inferior to 1931 by 60,000,000 bushels, the International Institute of Agriculture reports.

This drop is offset by a fall in the probable requirements of importing countries of 170,000,000 bushels. This situation has been caused by poor crops in the exporting countries and by a general increase in imports, coupled with an abundance of rye, corn and potatoes, the institute reports. Stricter regulations of international wheat trade have also played a part.

The total available for export is fixed at 1,300,000,000 bushels. Of this amount 600,000 bushels are held old stocks, and 730,000,000 bushels represent new crop.

Since the exportable stocks are adequate to meet almost nine-tenths of the needs of importers, practically the entire surplus of the 1932 crop will be carried over for consumption in 1933 and 1934.

It is estimated the existing stocks have increased by 110,000,000 bushels.

May Have Planned Robbery

Youth Arrested In Garden Of Ramsay MacDonald

London, Eng.—What was believed to be an attempt to rob Prime Minister Ramsay MacDonald or his house was revealed in a case in Hampstead police court.

Ivan Seruva, described as a British subject, was arraigned on a charge of loitering in the Prime Minister's garden. He was arrested, police said, in the garden of Mr. MacDonald's home at 5 A.M.

Mr. MacDonald received his lodges at Farnham, near Hampton, while parliament is in session, preparing his new cabinet. At 10 Downing Street, he was a well-dressed, thick-set youth, who speaks English with a foreign accent. He was carrying bricks under his arms when the police found him.

The prisoner said he had just entered the garden for a look around. He did not resist arrest.

Want Railway To Keep Agreement

Montreal Wants To Keep Agreement

The city of Montreal would like to see the Anglo-Canadian trade treaty reduced the duty on British cigarettes from \$1.10 to \$1.50 a pound, leaving the tariff against United States and other foreign countries at the higher figure.

The Anglo-Canadian trade treaty reduced the duty on British cigarettes from \$1.10 to \$1.50 a pound, leaving the tariff against United States and other foreign countries at the higher figure.

HEADS PENITENTIARY

Lieut.-Col. W. B. Megloghlin

Lieut.-Col. W. B. Megloghlin, M.C., of Ottawa, who has been appointed temporary warden of King's Mountain, Man.—Clustered about an impromptu sick bed in a little room in the administration building of the prison, a board of inquiry and staff learned from John A. Macneay that he knew little of the financial collapse that sent him to penitentiary for seven years.

Obviously suffering severely, the former lawyer, university bursar, churchman and financier lay propped up in his chair. When asked why he declared he no longer else to his knowledge, ever profited from the financial debacle that wiped out endowment funds of the University of Manitoba and the Church of England, and swept his own investment firm into bankruptcy.

At times writhing in pain and loss of breath with his hair close eyes, Macneay, who had been a member of parliament for 20 years, tried to emphasize his declaration. He had no memory of any happenings in his office, he said, and asked the commissioners, investigating \$1,000,000 defalcations in college funds, to allow him to continue his plans for providing information.

Has Little Information

Macneay Unable To Shed Much Light On Slushage Of College Funds

Stony Mountain, Man.—Clustered about an impromptu sick bed in a little room in the administration building of the prison, a board of inquiry and staff learned from John A. Macneay that he knew little of the financial collapse that sent him to penitentiary for seven years.

Obviously suffering severely, the former lawyer, university bursar, churchman and financier lay propped up in his chair. Interested In Grain Show

Eastern Provinces Preparing To Compete In All Categories

London, Eng.—The House of Commons moved without division to re-enact existing embargo against importation of Canadian cattle to the United Kingdom.

The House decided to lift the embargo after passing the meat quota clause of the Ottawa agreements, 203 to 65.

Malcolm MacDonald, son of the Prime Minister, and under secretary for the Dominions, explained there was no further need to exclude Canadian cattle from the country on the ground it might be diseased.

Interest in the forthcoming exhibition is very widespread in the east, Mr. Macneay stated, and farmers are working in close co-operation with provincial departments of agriculture to ensure the best possible grain samples for entry in the competitive classes.

The Exchange Question

Federal Government Is Deeply Concerned About the Matter

Ottawa, Ont.—The Canadian Government is very deeply concerned about the exchange question. Hon. J. S. Stearns, minister of Trade and Commerce, told the House of Commons. His remarks followed an amendment by G. G. Coote, (U.P.A.), MacDonald, who had asked that the ratification of the imperial conference agreement be coupled with an understanding to bring the Canadian dollar to parity with the pound sterling.

Another resolution bearing on international problems was introduced, when, after lengthy debate on currency, a motion was adopted urging the dominion government to take the responsibility of fixing the rate of exchange on the pound sterling at a parity of \$4.86%.

Another resolution bearing on international problems was introduced, when, after lengthy debate on currency, a motion was adopted urging the dominion government to take the responsibility of fixing the rate of exchange on the pound sterling at a parity of \$4.86%.

BALDWIN HAS A PLAN TO ASSIST IDLE OF BRITAIN

London, Eng.—Stanley Baldwin, Lord President of the Council in the National Government, informed the British press that the government is working on a programme to deal with the entire problem presented by the abled-bodied unemployed of the nation.

"We hope to get it into law by the summer of next year," Mr. Baldwin said. "Our plan is that it may be possible for something to be contained in the king's speech for the opening of parliament.

When asked to effect a really effective scheme, he said, "I am not capable of standing the test of the next half century."

"The 'hunger marchers,' who moved into a town ago to serve a set of demands on the government had to be a threat, but remained as a problem."

A few men have already gone back where they came from, but apparently the weary marchers in determined the march from beginning to end. Their demands, they said, included that they might as well be idle here as at home, and most of them stay on, sleeping in the places provided for them by city authorities.

British House Passes Pact

Ottawa Agreement Is Given Substantial Approval

London, Eng.—To the accompaniment of loud ministerial cheers the House of Commons gave third reading to the government's Ottawa agreement bill with a heavy majority of 348. The vote was 416 to 68.

The bill was then sent to the House of Lords.

It was stated that all the eastern provinces are making elaborate preparations to represent at the exhibition, not only in the competitive classes, but also in the non-competitive exhibition.

Interest in the forthcoming exhibition is very widespread in the east, Mr. Macneay stated, and farmers are working in close co-operation with provincial departments of agriculture to ensure the best possible grain samples for entry in the competitive classes.

Final hours of debate brought a renewed attack on the trade pact between the United Kingdom and the Dominions, particularly at the Ottawa Economic Conference, by Sir Herbert Samuel, leader of the free trade element of the opposition.

Sir Herbert declared Neville Chamberlain, Chancellor of the Exchequer, had been forced to compromise the trade pact by the government in some of the Dominion repudiating the agreement with the United Kingdom.

It had been made clear during the course of debate he demanded that the agreements which purported to be for five years could be altered at any time by parliament whenever it chose.

Mr. Chamberlain replied for the government that new Canadian legislation, particularly the Anglo-Canadian pact for five years, could not be altered within the next five years except to a limited degree specified in the agreement.

New Amendment

Ottawa, Ont.—A new amendment to the motion for ratification of the Canada-United Kingdom trade treaty was moved by Dr. Thomas Donnelly (Lib., Willow Bunch), in the House of Commons. It declares that no approval by the Canadian parliament be given to the trade pact until the entering of this country into any arrangement which may be proposed at the coming world economic conference.

Ratified Confident

Montreal, Que.—Confident that the government will find means meted of being helpful to those men affected by shut-downs in railway shops from coast to coast," Frank McKenna, chairman of the Federated Trades of the Canadian Pacific Railway, returned to Montreal from Ottawa after seeing the interview with Premier R. B. Bennett.

No Session Till January

Saskatoon, Sask.—Rumors of the possibility of the Saskatchewan legislature meeting in January were checked when Premier J. M. Anderson said it was extremely unlikely there would be a session until early in January. The premier made the statement on his arrival here last week.

Hunger Marchers Galore

London, Eng.—In their third attempt to enforce their demands, the unemployed "hunger marchers," who struggled into London, turned home. There were not enough aboard a chartered boat to start for Brighton, whence they came. Other contingents also prepared to go home.

Ice In North Receding

Geologists Say It Might All Melt In Time

Scientists seem determined to make our flesh crawl, as if they were succeeded in doing so it is certainly not from lack of—dare one say?—imagination. We are constantly being told of the most remarkable things that would happen if such and such an event took place in nature and if this or that miscalulation arose in the workings of the solar system. One of the latest recruits is Dr. J. H. Johnson, of the U. S. Coast and Weather Bureau, who declares that if all the ice in Greenland and Antarctic were to melt the water formed would raise the level of the ocean 150 feet, thus making sufficient to inundate a large portion of the world and all its seaports.

"Pooh!" says the phlegmatic public, "put the ice won't melt?" "Don't be too certain of that," interrupts a close friend of mine, "but the ice in the Arctic North is steadily receding." At certain periods, states the geologists, Greenland did not have much ice and these times may come again. About 10 A.D. the Danes were so successful in their raids that later became icebound and then melted again. The ice has been retreating for a long time now. From the 12,-000,000 square miles in existence at the period of the earliest glaciation there now remains only 6,000,000 square miles, mostly in Antarctic. Other cheerful geologists have recently pointed out that a drop of three degrees in the average temperature would bring about a new glacial, bringing back the glacial period and push the inhabitants of Britain, North America, and elsewhere down nearer the Equator.

Simply Not Done

Nothing In Stories About Toads Living Years Without Air

The load which is said to have lived for 33 years inside a cane ball at Forest Hill, N.Y., can be seen and more infant, an amateur in longevity. At Woodstock, Ont., while excavating for a sewer, a three-legged frog was found, so they say, imprisoned in hard clay five feet underground. The theory was that it had been buried alive for fifty to sixty years, living, so it was said, "on the tiny fibers sprouting from the roots of an old tree."

It was not bad, but not good enough to hold the record very long. A professor, an archaeologist at that, at Wellesley, Mass., made the solemn statement that in Corinth, Greece, when he was excavating in the ruins of the city, he found two toads interred in the same spot for 1,999 years ago. They blinked a bit, and then went on about their affairs.

These reports and others like them, which are picked from time to time from the news, indicate of course nothing more than the enormous capacity for self-deception possessed by the average individual, sewer-digger or professor. As the St. Catharines Standard put it: "The world is one hour around an old building which is being demolished, or a cement wall which is being smashed up; it is generally credited with having done the impossible, lived for years without air. And it is simply not done, not even by toads."—Ottawa Journal.

No School In Winter

Children In Colorado Mountains Kept Home By Snow

While school children all over the country returned to their studies after a summer's vacation, Hamilton's eleven pupils looked forward to the beginning of another vacation.

Hamilton, high up in the Greenhorn mountains in Colorado, is covered with deep snow during the winter months, making school attendance impossible. Instead of the usual summer vacation the children are given a vacation during the winter months.

Fool Proof Fire Alarm

A "false alarm proof" fire alarm box was one of the new devices on display at the convention of the International Association of Municipal Electricians at St. Louis. The new invention tests showed, handcuffs the person holding him until firemen, who carry the key to the handcuffs, arrive on the scene.

Of 4,200 varieties of flowers tested for Europe only 420 had a agreeable odor.

"I want to do something big and something clean."

"Then wash an elephant."

W. N. U. 1947

Apostle Of Cheerfulness

Famous British Surgeon Believed It To Be A Duty

An apostle of cheerfulness, Sir Charles James Symonds, pioneer of the modern medical profession, died recently, aged 80, held that "cheerfulness is a duty. It is essential to fitness of mind, and the gobble of life hate the singing of a gossamer. I make a practice of smiling at everybody. The result is that everybody smiles at me."

Other suggestions of the famous surgeon were:

"If you have a bundle of thorns in your lot, there is no necessity to sit on them."

"Don't look too closely for faults either in yourselves or other people, look for what is good and strong and beautiful, and the faults will drop off."

Since 1912 Sir Charles had been consulting surgeon to Guy's Hospital, London, England, which he had served for fifty years. For some years he was consulting surgeon to His Majesty King George V. In World War I he was successfully consulting surgeon to the Eastern Command, at Salonika, to the Netley Hospitals and to the Southern Command.

An amateur, William Symonds, left Australia in 1886 and arrived in Boston, Mass. Descendants of Willam Symonds later moved to Dalhousie, N.B., where Sir Charles was born.

He was one of the first surgeons to remove an appendix.

Strange Tales From Lost Property Office

People Leave Peculiar Things On Trains In England

It is amazing the things people lose at times. If you visit the Lost Property Office in London, England, you will probably find a great many articles of personal property. Clocks, pianos, motor-cars, and typewriters are amongst the things people leave behind them and then forget.

One can understand people losing collar studs or pins, but what about milk churns? Last year more than 3,000 were mislaid by farmers and dairy companies. Every week the company which handles these churns has an average loss of about 100,000 bottles. So serious are these losses that the dairies have established a regular sleuth service which tracks down every lost milk churn for sixteen months out. This is the story: "I can distinctly remember my father carrying me at the age of eighteen months to a confectioner's, where I tasted marshmallows, and can also remember about the same time another reprieving my brother and me very severely for being so rude as to say 'Shut up!' Another memory is even more clear. About three years ago a man who seemed to be a tramp came to my home and said, 'I can still see the fur rug on which I tripped rising up to meet me as I lay down.'

The world's record occurred in India a few years ago. A goods train disappeared in the north and was not found for several months, when it turned up many hundreds of miles away in the south.—London Tit-Bits.

Building Dam Across Nile

British engineering firms soon will submit tenders for a \$50,000,000 dam across the Nile at Aswan, Egypt, to divert the great flow of the river 100 feet to the Lake Albert, and to drain millions of square miles of marsh land, now an inhabitable hotbed of disease.

Auto bandits are active in Scotland,

The Ladies' Aid of the Carbon United Church will hold a chicken supper in the Farmers' Exchange Hall on Saturday evening, November 12, from 5:30 to 8:30 p.m. Admission, Adults 50¢; Children at 25¢.

Jos. J. Connolly, of the Carbon High School staff, is attending the teachers' convention in Calgary this week.

Mrs. Edwards Mrs. Torrance and Mrs. McElhinney were Carbon visitors last Friday.

Big Game hunting in Alberta started Tuesday and a number of men from the district plan to make the trip west to the foot hills this month.

Mr. and Mrs. T. J. Ramsey spent a few days visiting with relatives in Carbon last week and returned on Sunday.

Norman Nash, who is attending Mt Royal College in Calgary, spent the week end in Carbon.

Miss Mabel Brereton was out from Calgary over the week end, in attendance at the wedding of her sister.

On Tuesday evening the girls of the sewing circle gave a farewell party for Miss Kate Ramsey, at the home of Mrs. Nellie Ha. The girls presented Miss Ramsey with a silver butter half.

Miss Ellis Halsted was a Carbon visitor on Saturday.

Don't forget that Friday is Remembrance day, and a public holiday.

Last Wednesday afternoon Mrs. G. Oliphant held a gathering at her home in honor of Miss Kate Ramsey, in the form of a quilting bee.

Wednesday evening another party was held for Miss Ramsey by the C.G.L.T. at the home of Mr. and Mrs. J. J. Ophouse. The entertainment was in the form of a quiz-quiz and a very enjoyable time was spent.

Miss Mary Currie and Everett Poos left on Wednesday to attend the teachers' convention in Calgary.

The Builders' Hardware Store of Carbon will hold their annual sale commencing on Saturday, November 19th. This sale will only last for one week. Special Binders will be offered on all lines of hardware. Watch for the posters.

**Brown Thought
He Saved
Money**

OOO

Recently John Brown boasted... that he didn't need to subscribe to the local paper. He could read his neighbors should he wish to see something of importance. Now John Brown had a number of business interests in various parts of the district... He was also a great creditor. One day Sam Johnson gave us the ghost and departed to another land. Now it so happened that Sam had an estate and some debts, including a debt to Brown. When the creditor's notice was published Brown was unaware of the fact, and the estate was settled without the payment of the debts. The amount of about \$55 was lost. Had he been a regular subscriber to the paper this would not have happened.
